Subject: Re: Investigation of Ground Water, Contamination near Pavillion, Wyoming

Carl, I have started to review one of the QAPPs and find very helpful.

I would very much appreciate a copy of the sampling plan that was used at Dimock and also the Pavillion site. I hope there is not a problem in providing me these plans. If so please let me know.

Many thanks,
Rich

Dear Rich,

I recommend looking at the QAPPs that we are using for the HF study. The most recent versions are posted on the EPA public website (<http://www.epa.gov/hfstudy/qapps.html>). Two of these are from case studies in the Marcellus Shale and should be pretty helpful for what you are planning. If I had to start from scratch, that is where I would start. Then if you have additional questions after looking those over, please let me know.

Carl

We are getting ready to do an assessment drinking water wells of homes around a fracking site. I am preparing the

sampling plan and wonder if you all would mind giving me a copy the plan you used. I would also be very interested in any suggestions you might have for us.

thanks
Rich
